

58599 TT-02 RAYBRIG NSX CONCEPT-GT

1:10 4WD TAMIYA KIT

The Raybrig NSX Concept-GT is a racing car that was developed to race in the 2014 Japanese Super GT Series, and features a 1.6-liter turbocharged direct injection engine with anti-lag, plus a mid-ship layout that optimizes distribution of the car's weight, particularly taking into account its unique hybrid system.

Tamiya has faithfully reproduced this sleek racing machine in 1/10 scale on the TT-02 entry level touring car chassis. The TT-02 chassis platform is the successor to the TT-01 as it incorporates many new features to make it even easier for the new R/C kit builder to assemble and learn from. The TT-02 chassis performs well as cornering and overall speed has been enhanced to take advantage of new electronics available on the market. In addition to the TT-02 being an ideal platform to start from, R/C hobbyists can expand its potential by adding many of the Hop-Up-Options available to increase the cars speed and performance.

- Wheelbase: 257mm.
- The TT-02 is a highly versatile and easy-to-maintain chassis.

- Separate parts are included to recreate dynamic rear wing and unique door mirrors.
- Comes with black 10-spoke wheels.
- Includes body markings and masking stickers for use when painting the model.
- Includes Tamiya TBLE-02S ESC (capable of running brushed and brushless motors)
- Includes 540 Torque Tuned motor.

Required for completion; 2 Channel Radio System, 1 Servo, Battery and Charger, Polycarbonate Paint for the Body, Tools for assembly and Glue for the Tyres
