

ECX BOOST 1:10 2WD RTR RED/WHITE BUGGY ECX03004i

[Click Here For Video Clip](#)

Everyone loves a buggy and when they're as good as the ECX Boost, it's easy to see why and now, thanks to the new Waterproof Electronics and ECX 2.4GHz Radio system, the enjoyment can be taken further than before.

The ECX Boost is inspired by the off-road race scene with its low slung, chassis hugging body shell and its large rear wing. Dish style wheels complete with ribbed front tyres and multi-block rears complete the look to give this great value entry-level buggy all the charisma and feeling of a more expensive, race-bred machine

Powered by a 20T Dynamite 540 motor, the ECX Boost has more than enough speed for the newcomer whilst more experienced enthusiasts will appreciate the no-nonsense rugged durability of the design and the choice of tough plastics that can take all the abuse that a new racer can throw at it

Classic 2WD handling is assured, thanks to the rear motor configuration and the centreline mounted battery pack and thanks to the electronics revisions and the inclusion of a faster, 2A 1 hour battery charger, the all important learning curve can be scaled faster than before

Radio:

The Boost 2WD Buggy comes with a 2.4GHz radio system, providing extended range and interference-free operation and the ability to run multiple vehicles simultaneously.

Tyres:

All-terrain tyres, mounted to custom ECX wheels, provide relentless grip on the street or off-road.

Motor/ESC:

A potent, pre-installed Dynamite 20T motor and electronic speed control with reverse help power the Boost to high speeds.

Charger:

Hit the terrain in just 1 hour with the included Dynamite 2-Amp peak charger.

Chassis:

Like all ECX vehicles, the Boost 2WD Buggy has a tank-like chassis that will hold up against even the most brutal drivers.

- Completely ready to run with everything needed in the box
- 2.4Ghz radio system with waterproof receiver
- Waterproof servo
- Includes 2.0A 1 hour peak charger with 1-button operation
- Includes 20T Motor with a waterproof electronic speed control
