## OVERVIEW

The Blade 130 X is the only Bind-N-Fly, flybarless 100-class helicopter on the market with the convenience of a Bind-N-Fly package and the performance of a flybarless system. The Blade 130 X features the AS3X flybarless system, which provides stability, agility, control and power for the ultimate sub-micro heli experience both indoors and out. The Blade 130 X is capable of inverted flight and extreme 3D aerobatics such as loops, flips, rolls, funnels, hurricanes and tic tocs.

With its torque tube driven tail and variable pitch tail rotor coupled with its flybarless head design, the Blade 130 X is the highest performing helicopter in its class. It will be able to out perform the competition with its proven flybarless system, lightweight yet direct tail setup and the quality from Blade you've come to expect while still being offered at an affordable price.

## SPECIFICATION

Main Rotor Diameter	325mm
Length	305mm
Height	122mm
Width	51mm
Tail Rotor Diameter	76mm
Main Blade Material	Plastic
Tail Blade Material	Plastic

Main Motor Type	Brushless In-Runner
Battery	2S 300mAh 35C Lipo
Tail Drive	Torque Tube
Main Frame Material	Plastic
Canopy/Body Material	Plastic
Flying Weight	107g
Number of Channels required	6 channels
Main Rotor Head Type	Collective Pitch (CCPM) Flybarless
Swashplate Type	140 Degree
